DETAILED ACTION

Allowable Subject Matter

Claims 1-2, 4-14, and 16 are allowed.

The following is an examiner's statement of reasons for allowance:

Browne (WO 92,22983) discloses a random access multi-source recorder player wherein the recorded information is stored in the storage section and is further erased in a first-in/first out (FIFO) mode when storage capacity is approached as described on Page 19. Furthermore, the programs that are recorded can be selected to determine the order of deletion based on oldest programs, oldest viewed programs, and/or erase only selected programs to allow for proper erasing of programs as well as keep efficient storage space as seen in Figure 3 element 301. However, Browne et al fails to disclose an erasure method which would alter the recording time of the program as a manner of protecting the program from deletion. Therefore, it is noted that the conventional art does not teach, disclose, or suggest a system or method wherein the "oldest time and date of recording of said one or more pieces of information having been specified for the prohibition of erasure by the erasure prohibiting means are changed to have a current time and date of recording when said first recording medium is filled to capacity".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
